

May 3, 2022

To our clients, friends, supporters, and those who may have to travel:

In the face of the Supreme Court's outrageous draft decision to overturn Roe, we must stand, organize and fight for our rights like never before.

We own the right to control our own bodies, and we will take action to protect that right. We must link our movements and resources to stop this dismantling of our democracy through the blatant erasure of fifty years of legal precedent.

Abortion is LEGAL in California. We must do all we can to keep it that way. Women's Health Specialists will not retreat — we will rise and expand our abortion program by working with those in neighboring states who have been stripped of this essential right. And we will continue our advocacy to educate and create the next generation of reproductive health-care workers.

To join us in this struggle, please [donate](#) what you can. Your support will help to guarantee that all people throughout the U.S. keep their access to abortion.

Katrina Cantrell  
Executive Director  
Women's Health Specialists
