

FEMINIST WOMEN'S HEALTH CENTERS OF CALIFORNIA

July, 24, 2022

Community,

Today's decision by SCOTUS will affect the lives of young people for years ahead. Forced birth with the sole goal to punish pregnant people carries with it generations of harm.

The light at the end of this very dark tunnel? Clinics that will serve women traveling from other states, and individuals and funds who will step up to make this happen.

Women and their allies have been in discussions for months. We know that our strength lies in our ability to make our own decisions about our lives, not decisions that are forced on us through the Court and/or those who try to intimidate us, whether by the law or by threats and violence.

This is not the end of the battle to overturn half a century of legal precedent and strip individuals of their dignity – it's just the beginning... and after half a century of freedom, we're determined to fight to restore reproductive justice throughout our country.

We are justified in our outrage, but it cannot stop there. This is the time to address all levels of oppression and, a time to fight for the world we know can exist.

To keep us strong, please donate what you can. Your support will help to guarantee that all people throughout the U.S. keep their access to abortion.

In revolution.

Katrina Cantrell
Executive Director
Women's Health Specialists/
